

## Recommendation letter

Physics and Mathematics School-Lyceum No. ... was founded in 19... Since 19.., it exists as a textbook with an in-depth study of mathematics and physics. From the very beginning to the present day, the main task of the lyceum is to awaken the students' thoughts, creating an atmosphere of constant creativity, the desire to learn, and to fully encourage the independent activities of students.

Here children with special propensities for the natural-mathematical sciences study.

Graduates of the lyceum make up the gold core of the cadres of the new millennium not only in Kyrgyzstan, but also in many countries of the world: the first gold medal is Mis A, winner of the All-Union Mathematical Olympiad, graduated from P. Lumumba University of Peoples' Friendship, candidate of philosophical sciences. Mr P graduated from Moscow State University, works at the Academy of Sciences of the Kyrgyz Republic, Miss N - a graduate of 1985, now a doctor of technical sciences, lives and works in Canada. Mr U - headed the National Bank of our country, Miss A a - a graduate of the Plekhanov Academy, graduated from Hunter College in New York, led a project at UNDP in support of economic reforms in Kyrgyzstan, now the national coordinator of the International Fund "SOS-Kinderdorf International". "Children villages of Kyrgyzstan." Mr A is one of the designers of the Buran reusable spacecraft. And one of the creators of the unmanned aircraft, now a professor at the Massachusetts Institute of Technology etc.

Mr R is one of those student whom we are proud to recommend as an individual to enhance his knowledge further at the university. Being a part of the school community such as: sport and academic, volunteering. He actively joins in school life he helps us organize different types of concerts, competitions.

I would like to mention, that Mr R has striking characteristics and outstanding intellectual ability. He is a trustworthy, reliable, good-mannered student and friend whose caring nature and personality allow him to work well with others in team projects. Mr R. has amiable personality and is popular among his fellow students as he shows great consideration and respect for others.

From our collaboration I may conclude that Mr R's dedication, workaholism, intellectual ability and passion for learning are those traits that will help him in his further studying in the University and future career. I strongly believe that he will continue to express the same endeavor, persistence and enthusiasm that he demonstrated in our school. I highly recommend Mr R as a promising candidate for undergraduate study in your University.
